

Help tools in R

Exercises

Antonio Gasparrini

01 November 2023

1. Open the help page for the function `rm()`, and read through it.
2. Run the first example in the related section of the help page.
3. Open the help page for the package `SPLINES` and check what functions are included.
4. Open the global help page and search for functions to perform a meta-analysis.
